

As it is our purpose to restore the nobility and cultural dignity of our ancient ancestry, we propose a building scale that is consistent with a peoples who's cutting edge architectural and engendering skills were the marvel of the ancient world. We will use the cutting edge technology of today for the building of our cities, central meeting places, places of commerce, and personal dwellings. We will be mindful that each structure should be purpose designed to accentuate and facilitate a life lived in harmony with nature, the elements, and one another. The architecture should form the foundation for a community that prioritizes the health and wellbeing of the individual and the collective, while holding sacred the land the earth and the sky.
